

Using Community Connections

Information and Signposting

Words in **bold** will be explained

Disability Positive works with Cheshire West and Chester Council to run the **Community Connections** Service.

Our **Community Connections** service can help you to find out about activities in your local area for disabled children and young people.

This is called **Information and Signposting**.

If you would like to use our Information and Signposting service, you will need to fill in the form on our website www.disabilitypositive.org/services/community-connections

When we get your form, we will speak to you to find out what your child or young person is interested in.

We will then find out about what activities there are in the local area.

When we have done that, we will give you a list of the different options either by email or by post.
