

# Disability Positive Our Strategy 2020-2030

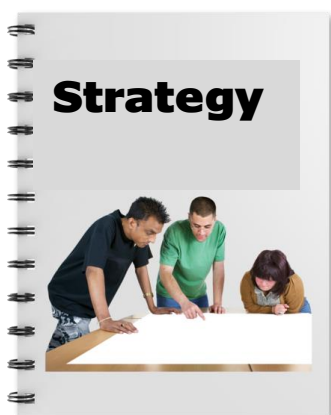

We are Disability Positive.

We offer services to help with everyday life.

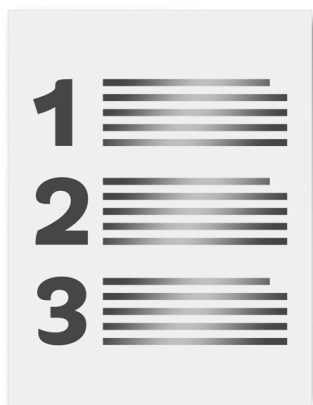

We offer opportunities to do new things and meet people.

We offer a voice to disabled people.

This is our strategy. It says what we want to do between 2020 and 2030.

If there are any words in **bold** that you do not understand, these are explained.

Our strategy is set out under three headings.

These are:

1. Services
2. Opportunities
3. Voice

## Services

We want to make sure more people can get information and help about the services they need

We want to make sure people can **live independently.**

**Live independently** means that you live in the community with choice and control over what you do

We want to make sure people know it is important to have services that are led by disabled people

We want to work with other organisations to help us to do this

## Opportunities

We want to offer the chance for people to go to social groups that meet their needs

We want to help people to improve their health and the way they feel

We want to help people to volunteer and get paid jobs

## Voice

We want to **campaign** for **equality** for disabled people.

A **campaign** is a set of activities that are done to achieve something.

**Equality** means having the same rights and opportunity as everyone else

We want to support more people to say what they want and understand their rights

We want to set up **advocacy** training.

**Advocacy** is a service that helps people to say what they want and understand their rights

We want to change the way people think about disabled people by providing training to companies

We want to talk to the government about the changes we want to see
