

Disability Positive Impact Review 2023 to 2024

This document is Disability Positive's Impact Review.

Our Impact Review explains the things we have done between April 2023 and March 2024.

It also explains what difference it has made to people.

Words in **bold** will be explained.

We are Disability Positive.

We offer **services**, **opportunities**, and a **voice** to disabled people and people with health conditions that affect them for a long time.

Our Impact Review talks about what we have done in our services, our opportunities and how we have given people a voice.

Disability Positive Impact Review 2023 to 2024

Our **services** are things like payroll, supported banking and help with arranging care and support.

9,015 people used our **services** this year and nearly all of them (98%) said that they were happy or very happy with our services.

Our **opportunities** are things like our social groups, our befriending service and volunteering.

Disability Positive Impact Review 2023 to 2024

There were 492 people who used our opportunities this year.

Most of them (96%) said that they felt their Independence, Self Confidence, and Opportunity to Socialise had got better

Voice is about **policy influencing** and **advocacy**.

Policy influencing is telling government and local councils about what our members think and the changes we want.

Advocacy is help with saying what you want and understanding your rights.

Disability Positive Impact Review 2023 to 2024

203 people used our Advocacy service and all of them said they were happy with it and that using it made sure they knew their rights.

We were part of 4 different national groups that talk to the government about the changes we want to see. We replied to 3 **consultations**.

A **consultation** is when government or a council asks people what they think about something.

You can find information about the money we spent in the main Impact Review document.
